PROFESSIONAL SUMMARY

Flutter Developer with 2.4+ years of experience in Flutter and Dart, building and deploying **production-grade mobile applications** for **Android and iOS**. Strong expertise in **REST API integration, Firebase, state management (Provider), secure authentication (JWT, access and refresh tokens), payment gateway integration (Razorpay, KNET), Play Store / App Store deployment**, and Agile delivery practices using **Jira**.

Skills

Frameworks & Mobile Development: Flutter, Android Development, iOS Development, Cross-Platform Mobile Development

State Management: Provider, Bloc, State Management

Architecture & Design Patterns: Clean Architecture, MVC, MVVM

Backend & API Integration: REST API Integration, JSON Parsing, JWT Authentication, Access Token, Refresh Token, Token-Based Authentication

Firebase & Cloud Services: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Firebase Analytics

Payments & Commerce: Razorpay Integration, KNET Payment Gateway, Wallet Management, Payment Processing

Background Services & Notifications: WorkManager, Alarm Manager, Push Notifications, Local Notifications

AI & Automation: OCR, AI Integration, Gemini AI, Resume Parsing

Deployment: Play Store Deployment, App Store Deployment, TestFlight

Tools: Git, GitHub, Postman

EXPERIENCE

Profile: Nexgen Aastra Technologies

Feb 2025 – Present

Developing and maintaining production-grade Flutter applications for Android and iOS, focused on eCommerce, wallet, payment, and service-based platforms.

- Implemented secure authentication flows using JWT, access tokens, and refresh tokens.
- Integrated payment gateways including Razorpay and KNET, handling payment success, failure, timeout, and refund scenarios.
- Designed modular UI components and optimized widget rebuild cycles using Provider-based state management to improve runtime performance.
- Integrated REST APIs for dynamic data handling, order management, and transaction processing.
- Implemented background services, push notifications, and scheduled tasks using WorkManager and Alarm Manager.
- Collaborated closely with backend teams to design APIs, validate responses, and improve overall system reliability.
- Led feature ownership from requirement analysis through development, testing, and Play Store deployment.

Profile: Kosuke Technologies

January 2025 – Feb 2025

- Developed and deployed the Click & Contact Admin Panel application on the Google Play Store, enabling dynamic website and content management.
- Implemented new features and UI enhancements using Flutter, improving usability and application responsiveness.
- Optimized application performance and reduced load time by approximately 15% using efficient state management with Provider.

- Worked on bug fixes, enhancements, and release updates to improve overall user experience.

Profile: Renixe InfoTech Private Ltd

November 2023 – December 2024

- Designed and delivered 5+ production-grade Flutter applications, including a scalable app exceeding 10K+ installs, implementing Clean Architecture, centralized REST API integration with token-based authentication, and structured release management aligned with business requirements.
 - Integrated Firebase services including Authentication, Cloud Firestore, and FCM for real-time updates and push notifications, ensuring reliable user session handling and engagement.
 - Designed and integrated RESTful APIs with structured error handling, response validation, and retry mechanisms to ensure resilient network communication.
 - Actively participated in sprint planning, story estimation, and daily stand-ups, tracking tasks and release cycles using Jira and Git-based workflows.
 - Reduced app load time by 15% by optimizing widget rebuild cycles, implementing efficient Provider-based state management, and minimizing unnecessary API calls.
- Collaborated with backend teams to define API contracts, validate payload structures, and test integrations across Firebase, SQL, and PostgreSQL-based systems.

EDUCATION

Bachelor of Computer Science and Engineering (8.2 CGPA)

Jeppiaar Institute of Technology, Chennai | 2019 – 2023

PROJECTS

ATTI Cafe – Food Ordering & Payment Application

Company: Nexgen Aastra Technologies

Platform: ([Android](#) & [iOS](#)) || | Role: Senior Flutter Developer

Role: Flutter Developer

- Developed a Flutter-based food ordering application supporting dine-in and takeaway workflows.
- Integrated Razorpay payment gateway, handling payment success, failure, timeout, and cancellation scenarios.
- Implemented order tracking, wallet management, and inventory validation using REST APIs.
- Built reusable UI components and optimized performance using Provider state management.
- Deployed and maintained the application on Google Play Store and Apple App Store.

Aastra AMS – Asset Management System

Platform: ([Android](#) & [iOS](#)) || | Role: Senior Flutter Developer

- Built a cross-platform Flutter application for asset tracking and lifecycle management.
- Implemented secure authentication and role-based access control.
- Integrated REST APIs for asset creation, assignment, status updates, and reporting.
- Designed scalable UI architecture for enterprise-level data handling.
- Released and managed production builds on Play Store and App Store.

HMS / PMS / IMS – Enterprise Management Systems

Platform: ([Android](#) & [iOS](#)) || | Role: Senior Flutter Developer

- Contributed to the development of Hotel Management System (HMS), Property Management System (PMS), and Inventory Management System (IMS).
- Implemented booking management, inventory control, and reporting modules using Flutter.
- Integrated backend services through REST API integration.
- Designed reusable components for large-scale, data-driven applications.

Click & Contact – Admin Panel Mobile Application

Platform: (Android) | | **Role:** Frontend Developer (Flutter)

- Developed and deployed the Flutter-based *Click & Contact* admin panel application, enabling dynamic website and content management.
- Implemented feature enhancements and responsive UI improvements using Flutter.
- Optimized performance and reduced load time by ~15% using efficient Provider state management.
- Delivered bug fixes and release updates to improve overall user experience.

Marina: E-Commerce Mobile Application Team

Platform: (Android) | | **Role:** Frontend Developer (Flutter)

- Developed a **Flutter-based eCommerce platform** enabling users to discover and access services from vendors.
- Integrated **Firebase** for user **authentication** and **real-time database updates**.

Implemented features for exploring categories, viewing ratings, and reviews, leading to a **20% increase in user engagement**.

GetTaxi - Driver Management Mobile Application Team

Platform: (Android) | | **Role:** Frontend Developer (Flutter)

- Built a **Flutter app** for drivers to manage ride requests, optimizing dispatch cycles..
- Designed a **ride acceptance algorithm**, increasing acceptance rates by 20%.
- Delivered a **responsive UI**, improving driver usability and app performance.

More Projects & Portfolio: <https://sanjai-cv.netlify.app/>

CERTIFICATIONS

- **Flutter & Dart - The Complete Guide [2024 Edition]**, Academind
- **Frontend Developer (React) Certificate**, Hackerank

SOFT SKILLS

- Strong **analytical** and **problem-solving** abilities.
- Excellent **communication and teamwork** skills, fostering innovation and collaboration.
- Adaptability to new technologies and frameworks.

KEY ACHIEVEMENTS

- Successfully deployed 8+ apps on the Google Play Store with an average rating of 3.0+.
- Improved app performance and reduced bug reports by **30%** through efficient debugging and optimization.
- Contributed to a **20% increase in user engagement** by implementing user-friendly features and designs.
